flyaero GmbH was founded in 2021 by Holger Petermeier after managing the company ferry-flight.eu for more than 10 years.

Mr. Petermeier holds a Master Degree in civil engineering from the University of Muenster in Germany. After his Master Degree he stepped into the aviation business and is rated on Airbus A32F, A330, A350 and A340. Since 2011 he performed more than 250 demo flights on basis Airbus ISTAFM including Part 3 (qualified and trained).

In 2020 Mr. Petermeier was part of EASA pilot team for the first A321P2F conversion at Singapore's ST Aerospace together with Lufthansa Technik.

Why flyaero GmbH?

Since 2011 we have grown to a small team of aviation professionals; engineers, qualified pilots for special missions like demo or MCF flights and special flight planning. From the beginning in 2011 we are specialized in flights like ferry flights, check flights, and delivery flights.

With flyaero GmbH we are now able to deliver operational and technical support to lessors, airlines and banks that require the safe, efficient and cost effective delivery of their aircraft. We provide our customer with a complete turnkey solution that is kept entirely in-house to reduce overall costs.

We can almost support all types of commercial aircraft including: **Airbus, Boeing and others**

Why us? That's simple, we know your needs....

Get rid of the hassles moving aircraft into Europe or China by using our experience in importing and exporting aircraft with CAMO knowledge and experience with national requirements.

Avoid the discussion circles concerning records by our records review and sorting/scanning service as we reflect and understand your contractual requirements and the authority requirements.

At every aircraft transfer the efforts with documentation for the years of the contract?

We can offer steady running documentation solutions in the lease time, helping in case of unexpected end of lease contracts or repossessions.

At aircraft end of life only using certain high value parts? We recommend from experience other useable aircraft parts which can be used for other assets or sold in the aftermarket. For flexible storage and marketing solutions contact us.

Expensive positioning flights with needless fuel burn and overflight fees before scrapping?

Flexible Dismantling Service at site of aircraft or at our location with competitive pricing. For a detailed project contact us for solutions and estimates.

What we offer:

Aircraft Delivery and Transition Services
